WELCOME TO Amarillo AVIATION FOR KIDS! (K-12)

We all know that kids learn best when they are actively engaged in the learning process. What better way to keep kids involved than to give them something unique to discover. Aviation can be just the tool you need to help keep kids excited about learning.

Coyote Flight Centers is locally owned and proud to help you bring aviation to life in your classroom and at home. We serve Civil Air Patrol as Aerospace Educators and are FAA Safety Team Representatives. There is much we can offer for the young people in our community through aviation.

Aviation can be used for all core subject areas. We have activities, experiments and plenty of ideas to help you reinforce what you are teaching.

What the "Aviation for Kids" program has to offer:

1. This website will be updated with activities, ideas, WebQuest, downloadable pages for your students and links to additional resources and materials.
2. Tours can be arranged to come to the hangar and view a variety of aircraft. Depending on the availability of aircraft, your students can actually sit in one.
3. Educational materials can be developed specifically for the needs of your class based around current TAKS.
4. Career days are awesome! Many kids are unaware of the numerous opportunities in aviation. Materials and presenters are available to join you in your school.
5. Summer programs are available to students with plenty of hands-on activities and experiments for all ages.
6. Email updates for teachers and parents.
7. "Ground School" classes for high school students.
8. Need an idea to find something different to teach a subject? No problem.
9. Teacher participation recognition and annual awards given.
10. Local contact for support and assistance when you need aviation related help.

**The sky is the limit!
Let us know how we can help you!**
